This step is quite easy, you have to get into google cloud, there you follow all the step to create your account and you must register a credit card or debit card because if you do not do it, you can only make one request per day, and registering one, you have a large number of requests until google starts to charge you.

Step2

After getting your google cloud account, go to console it must be in the upper right corn

Step 3

Go to the legend next google cloud platform

click on new project

STEP 5

Fill the fields and click on create and then do the same as step 3, but select your project instead of new

Step 6

Go to the navigation menu and look API and services, and then library

Go to Places API, if it is not there, it is on see everything

Step 8

Click on enable

You will appear here, if not go to the navigation menu and look for API and services, and then credentials, click on credential

Step 10

Click there

This is the last step only click on create credentials and select api key, and after it click on close

Now you have your API key 😂
